 - **SwiftUI**
 - Android Studio, Xcode
- Server-side
 - **Amazon Web Services (AWS)**
 - **Ktor**
 - **MongoDB**
 - Containerizing, Docker
 - Github Actions (CI/CD)
 - IntelliJ IDEA

About me

Dear, my previous work experience relate to mobile development. But I had a long time to research, prepare for multi-platform development's world with taking **Kotlin Multiplatform (Kotlin/Swift), AWS, MongoDB** as pillars.

Despite having a vast ecosystem and stable community, it's hard to say SQLs, Java, C#, Python, PHP, Javascript are modern databases, programming languages. The IT world always evolving, brings along to numerous enhancements. So, I come here to bring IT modernization in order to stand side by side with SMEs.

- In the last 2 years, I've alone launched mobile apps from scratch, having experienced registering organization accounts, launching apps on App Store & Google Play.
- At the present time, knowledge spreads out from **client-side: web, mobile, desktop** to **cloud/server-side** thanks to the **Kotlin Multiplatform** technology.
- Having experience about **team/project management**, although it's small team and on the mobile-side.
- Embracing modern **Google Material Design & Apple Design** ecosystem thanks to **Jetpack Compose & SwiftUI**.
- English skills: reading, listening, writing, speaking.

Certifications

From official **Amazon Web Services (AWS), MongoDB, LinkedIn's** partnerships,...

- **LinkedIn (logged in required)**
-

Education

Physics & Electronic Engineering
Sep 2013 - Jan 2018
VNUHCM - University of Science

Experience

Mobile Developer

World Wave Culture Technology | May 2023 - Oct 2023

Framework: Flutter (Dart) with Riverpod

Mobile team size: 2

I came **WWCT** in order to maintain, expand **BallScore** in Vietnam. After receiving the project for a while, because of its downside for long-term, I requested replacing it by new one which is named **EzScore** in later. Despite at beginning, I was tough time because of no document, old source code was mess and much Chinese words. But, without helping much from Chinese devs, I'm alone:

- Organize source code structure, determine app architecture.
- Configured environment variables for security. Split Prod/Dev flavors from develop to deploy.
- Pick vital packages; define Light/Dark theme, styles; code common components, widgets.

EzScore was deployed in App Store/Google Play in three locales: en-US, vi-VN, zh-CN.

The app used to be on top of Sports category in Vietnam market.

Mobile Developer

ABA Cooltrans | Mar 2022 - Mar 2023

Framework: Kotlin, Swift

Mobile team size: 1

I came **ABA** when previous mobile teams had left with their unsuccess work. Work as solo mobile dev, I cleared up old mobile projects and replaced with new ones, deployed them on App Store (Unlisted app), Google Play. After receiving business requirements, I based on that in order to brainstorm UX/UI, pick techniques, list to-do, then send them to my team leader for adjustment and approval.

- **ABA Smarter** | Sep 2022 - Mar 2023
For employees in ABA: HR management, fee approval, read yield of goods, KPI,...
- **ABA Delivery** | Mar 2022 - Mar 2023
For drivers, bikers in ABA: food delivery flow, fee request, feedback, read delivery log, salary, KPI...

Mobile Developer

AQ Booking Limited Vietnam | Apr 2021 - Jan 2022

Languages: Kotlin, Swift

Mobile team size: 2

I joined **AQ** and working on [REDACTED] in mobile-side, it also is primary company's project which for Elite Travelers who enjoy planning their own exclusive luxury trips.

The project is outstanding by complicated business logic incorporate with beauty UX/UI design.

I, with another co-worker, developed app & subsystems from scratch, deployed it on Stores.

Mobile Developer

Houze Group JSC | Mar 2020 - Apr 2021

Framework: Flutter (Dart) with BLoC

Mobile team size: 3

As least experienced member, I just coded features which relates to mobile Dart code, nothing else.

- **Houze** | Oct 2020 - Apr 2021
Helping residents with features: management, payment, inbox, notifications, run event.
- **Houze Agent Manager** | Sep 2020 - Oct 2020
For managers in Houze Agent system.
- **House Map** | Mar 2020 - Sep 2020
Connecting between real estate broker & client.
